---

## Summary

Software Engineer with good hands-on experience on backend development such as Golang, Nodejs and blockchain technologies such as Ethereum and Hyperledger Fabric.

---

## Core Technical Skills

**Strong:** Nodejs, JavaScript, Reactjs, Docker, Golang, Hyperledger Fabric, Blockchain

**Knowledgeable:** Azure, AWS, GCP, Mocha, Git, SQL, NoSQL, Ethereum, Kubernetes, Redis

---

## Experience

- Deloitte** **Hyderabad, India**  
*Solution Advisor* *Mar 2020 – Present*
    - Working as a Backend Developer in the Blockchain Auditing Tool.
    - Developing and maintaining the backend solution in C# .Net, Nodejs and Python.
    - Improved the tool performance by 20% by refactoring the legacy code.
    - Reduced the operational cost and workload by 30% by automating the maintenance activities using bash and nodejs scripts.
    - Increased the tool reliability and durability by 20% by using nginx as reverse proxy and load-balancer.
    - Facebook Intern: Risk Assessment Advisor of Novi Node Project.
  - Side Projects** **Hyderabad, India**  
*Software Developer, Technology Writer* *Jan 2018 – Present*
    - Author of **Playtime with Hyperledger Composer** eBook.
    - Author at freecodecamp, My Blog, Medium and Codesource.io. I write articles and tutorials on Golang, Nodejs, and Blockchain.
    - Actively engaged in the architecture and development of a SaaS solution Howler.in for bloggers.
    - Microservice Projects: Blockchain Dapp, Coffee-Hai(supplychain management).
  - MSR Cosmos** **Hyderabad, India**  
*Software Engineer* *Aug 2018 – Mar 2020*
    - **Backend Developer in the Blockchain as a Service Project** and responsible for designing, developing and maintaining the backend implementation in golang, nodejs, and hyperledger fabric.
    - Facilitated in acquiring multiple venture capitals for MSR Cosmos by developing SupplyChain, Insurance, Retirement Plan, Ticket Counterfeit, and Document Stamping on the Fabric and the Ethereum Blockchain.
    - Improved platform efficiency by half using Golang in the backend.
  - Infosys** **Bangalore, India**  
*System Engineer & Blockchain Developer* *Jun 2016 – Aug 2018*
    - Conducted research on various blockchains and developed PoCs of the client's business model on the Ethereum and Hyperledger Fabric blockchains to encourage acceptance of the blockchain technology across the different business sectors.
    - Successfully migrated the SharePoint 2010 on-premise sites to the SharePoint 2013 Azure Cloud.
-
